United States Department of Agriculture (USDA) Farm Service Agency (FSA) maps are for FSA Program administration only. This map does not represent a legal survey or reflect actual ownership; rather it depicts the information provided directly from the producer and/or National Agricultural Imagery Program (NAIP) imagery. The producer accepts the data 'as is' and assumes all risks associated with its use. USDA-FSA assumes no responsibility for actual or consequential damage incurred as a result of any user's reliance on this data outside FSA Programs. Wetland identifiers do not represent the size, shape, or specific determination of the area. Refer to your original determination (CPA-026 and attached maps) for exact boundaries and determinations or contact USDA Natural Resources Conservation Service (NRCS).

USDA is an equal opportunity provider, employer, and lender.

FIELD NO.	PLANNED		APPLIED		LAND USE AND TREATMENT
	AMOUNT	YEAR		MONTH AND YEAR	
1	107.61 ac	2025			Corn-Soybean Rotation: Corn is <u>NO-TILLED</u> into soybean stubble leaving at least 40% residue. Anhydrous <u>can</u> be used when applied on the contour. Soybeans are <u>NO-TILLED</u> into corn stalks leaving at least 60% residue. CRITICAL AREA PLANTING: Required on all fields Field Borders: are required in all areas to eliminate any end rows where the planting of end rows would exceed a row grade greater than 5%. Grassed waterways: are required in all areas where the concentration of water will cause ephemeral gullies. Waterways are recommended to have a minimum width of 30 feet and a depth of 1 foot and parabolic in shape. Waterways should be seeded to a sod forming grass (Brome 20 lbs/ac perennial rye 5 lbs/ac and 1.5 bu of Oats).
