INSURABLE CROPS

County Yields

Yield is a measurement of farm productivity and reflects how soil characteristics, weather, inputs, and farmland management decisions interact to produce crops. Yield data is collected over time to analyze trends on a county and state basis. Increased yields bring higher farm income and contribute to farmland appreciation.

Crop Insurance

The USDA Risk Management Agency offers agricultural producers financial protection against losses due to unforeseen circumstances that negatively impact crop production. The insurable crops and revenue guarantee provided from the RMA allows for deeper underwriting and analysis of an agricultural asset and its production region.
